

Annual Seminar

10th

Cleveland OHIO

May 18, 2007 LuK USA Plant Tour

May 19, 2007 Expert Speakers and Technical Presentations

Mark your calendars!

Don't miss out on this two-day event! Friday's main event will include a bus trip to the LUK USA, LLC facility for a plant tour of their torque converter plant in Wooster, Ohio, which should not be missed.

Saturday will feature our traditional classroom seminar with a great lineup of OEM speakers, as well as presentations by Sonnax, Raybestos, Dacco and many others.

Registration Cost:

\$195. for Members

\$175. each additional member

\$245. Non-Members

PRICE INCLUDES ALL TCRA FUNCTIONS

Don't miss this opportunity to get the latest torque converter updates while meeting up with old friends and fellow converter rebuilders and a chance to catch up with the latest developments in the torque converter rebuilding world.

For updates or additional information, contact Len Wack at 802-885-2292 or visit the TCRA website at www.tcraonline.com.

Question and Answer Session

LuK USA, founded in Wooster, Ohio in 1977, is a Tier 1 supplier, manufacturing drivetrain components for the global auto industry. LuK USA is a subsidiary of the worldwide Schaeffler Group, which includes the brands LuK, INA, and FAG. LuK is a highly-integrated and automated manufacturing facility that combines the best of European and American technology. We design, develop and manufacture engineered solutions in the areas of clutches, discs, dual-mass and conventional flywheels, torque converters and torque converter clutches. Our 1000+ employees are highly-motivated and dedicated individuals, who continually strive to develop expert technical knowledge, state-of-the-art process systems and excellent quality in more than 600,000 square-foot manufacturing and engineering facilities in Wooster. With the latest technologies, equipment and tools, LuK takes the product from concept to customer and has consistently earned the automotive industry's highest awards. This commitment to excellence allows us to remain in the forefront of the drivetrain market.

LuK Speakers

Marc McGrath is Vice-President of Technical Product Development for LuK USA and is also Product Line Leader for Torque Converters globally. He has a BSME from the University

of Akron and 18 years experience in automotive product development; including design, testing, simulation and program management. Mr. McGrath's various teams design, develop and produce torque converters, manual clutches, and other transmission components; as well as providing calculation and simulation, testing and advanced development resources to the Schaeffler Group in North America.

Tim Coppock is the Director of Testing and Materials at LuK USA. Mr. Coppock has been with LuK since 1991, prior to which time he worked in testing and research for over 14 years at

the Firestone Tire Company. He is currently involved with the development of a torque converter durability test, a shutter prediction test, and torque converter fuel economy measurement. Mr. Coppock has a BS in Aeronautical & Astronautical Engineering from Purdue University.
